

# INTERN>XFO

*Brought to you by-*

# Why InternXpo?

Problem

Classroom theoretical knowledge - not sufficient for industry  
Need experience regarding working on industry level projects

Solution

## Internships

# Why Internships?

- Apply theoretical knowledge
- Acquire knowledge and experience
- Prepare for full-time employment opportunity
- Get in-depth knowledge about specific field

# What do we cover?

01

Companies and MSC's

02

Alumni Start-up's

03

Departmental Projects

04

Student Chapters and Mega Projects

# Companies and MSC's

- We have contacts with many companies which are looking for enthusiastic and hardworking interns.
- Through our medium we provide you the perfect opportunity to kickstart your professional journey

# Alumni Start-up's

- We have a strong alumni base and many of them have their own startups.
- These startups are very keen to hire students as interns from our college. This would turn out to be a mutual benefit for both the student and the organization.

# Departmental Projects

- Each department in our college takes up as many projects as possible on a yearly basis and many students are unaware of it.
- Hence, every department will have a stall wherein, each stall can take up desired number of students as interns for working on the departmental projects

# Student Chapters and Mega Projects

- Potential mini projects executed by students can be further taken under department level internships or as student startups in order to evolve their mini-project to a much larger and better scale.
